

Fluid Program – Product Category

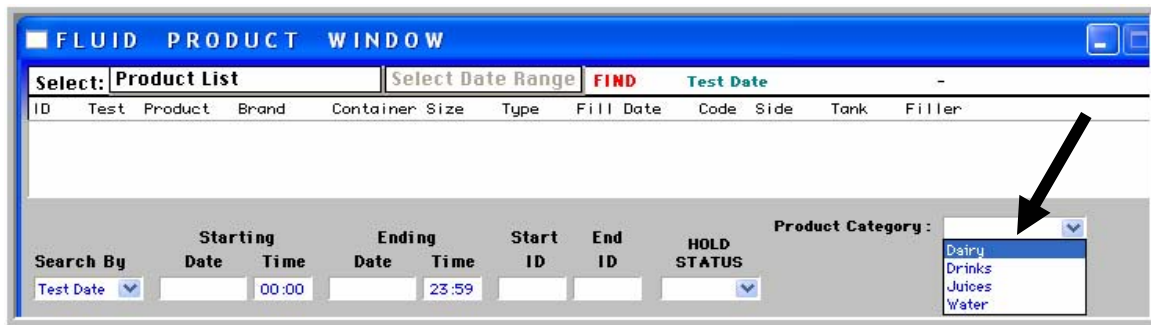

New item added to the Fluid program: Product Category

This new feature will enable you to categorize the product that is tested. You then can easily distinguish, for example; *Dairy Products* from *Drinks, Juices, Water Samples*, etc. for graphing and reporting purposes.

Set up in *Support Lists*: Set *Category* for each product in the *Fluid Product Specification Window*:

When choosing *FIND* you can specify a *Product Category*.

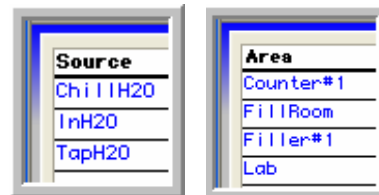

Fluid Program – Source & Area

New fields: Source & Area

Set up *Source* and *Area* in *Support Lists*.

Source: To identify a source where a sample was taken. An example may be identifying location of *Plant Water* samples.

Area: To identify an area where a sample was taken. An example may be identifying an area for *Air* quality samples.
