

Raw Program – Scheduling

New Tab and View added to the RAW program: Scheduling

To Schedule Incoming Tankers in QA Studio:

Choose *Add* then go to the *Scheduling Tab* and enter the *Product*, *Scheduler's Initials*, *Scheduled Delivery Date and Time* and *Load Number*. (For example if you will be receiving 15 tankers can enter load # 1 thru 15). Then enter. You will then remain on the Scheduling Tab until Scheduling is complete and *Product*, *Scheduler's initials* and *Delivery Date* will remain in the designated fields until you are done scheduling.

Outbound Loads can also be entered on the Scheduling Tab.

There is a Scheduled View option to see the Tankers that are due in for the day.

ID	Product	Supplier	Truck	Route	Load#	Manifest	Sched IN	Date/Time In	Arrival	Init	Customer
R001	Raw				1		10/10 02:00	10/10 00:00		AAA	
R002	Raw				2		10/10 03:00	10/10 00:00		AAA	
R003	Raw				3		10/10 04:00	10/10 00:00		AAA	
R004	Raw				4		10/10 05:00	10/10 00:00		AAA	

Raw Program – Plant Scale

New field in Raw Program: Plant Scale

In addition to the *Manifest Weight* and the *Plant Meter* we have recently added a field for the *Plant Scale*.
