

Spotlight Feature: Bar Code Report

- * Available in the Fluid, Ice Cream and the Culture Program.
- * Can be used to generate a bar code for scanning items that do not currently have a bar code.

For example:

In the Ice Cream program; this feature can be used to generate bar codes for the ice cream mixes.

- In the Ice Cream Product Specification window; highlight the base mix such as 10%W. *The base mix should have the Product Category identification.*
- Click Add. Add a flavor (ex. WhiteMix). Add a brand (ex. In-house).
- Go to the Weights window in the Ice Cream Product Specification window. Click Add.
- Add a container (ex. whirlpack, vial). Add a size (ex. 2oz, 4oz, bag).
- Add a tare of 0. Add a net low of 0. Add a net high of 0.
- Add a UPC code of your choice between 5-7 characters (numbers and/or letters with no spaces).
- Click OK.
- At the bottom of the Ice Cream Specification window, click the Spec Reports menu.
- Select Bar Code Report and print.
- Bar Code Report can be used to scan when a particular mix is tested. Several fields will auto-fill making data entry fast, accurate and efficient.
