

February 2008

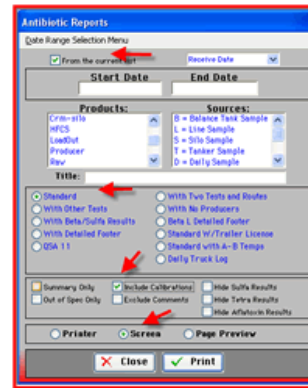

New!

New!

Fluid Program: The ability to graph test results by the hour. Benefit to QA Studio users: Enhanced troubleshooting abilities.

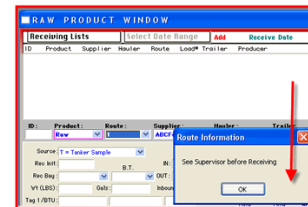

Raw Program: QA Studio will remember the last report printed and make the necessary choices automatically the next time you print the report. Benefit to QA Studio users: Improved efficiency when printing reports.

New!

Raw Program: The ability to flag a route with a message. For example, if a specific route is on a "Do Not Receive Route" list, and the route is entered into QA Studio, and alert box can pop up with your specific message. To set up this feature > enter your message in the Raw Support Lists on the Route tab under Message and click OK to save (To remove message, clear and click OK to save). Benefit to QA Studio users: Receivers will be alerted to routes that have an issue and they will see your specific message when entering the route into QA Studio.

Route	Def Supplier	Def Truck	Producer(s)	Avg Bif	Message
1	HBC/Enns	RCIE	1000, 425, 950	3.59	See Supervisor before Receiving
2	PHILFARMS	JETTFRMS		3.99	
3	PHILFARMS	JETTFRMS	BESIE	3.24	

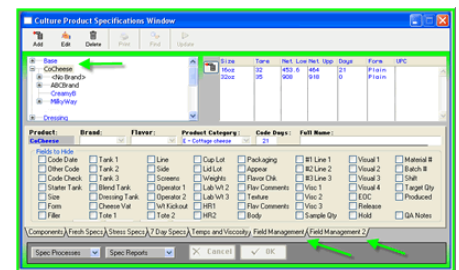

New!

Culture Program: The ability to FIND data using the Quick Dates. Benefit to QA Studio users: Increases efficiency for finding data.

New!

Culture Program. The ability to HIDE fields corresponding to the type of product entered into QA Studio. Highlight the "Parent" specification and choose the fields to hide from the Field Management tabs. Benefit to QA Studio users: Easier and more comprehensive data entry.

Workshop offered by Randolph Associates, Inc.
