

Newsletter for January 2008

Set Default Source by Product

Go To Raw Program Menu > Raw Product Specifications > Receiving Specs Tab > Set the Default Source.

Some possible examples below:

Product	Source
Raw	Tanker
Raw-silo	Silo
Raw-BT	Balance Tank
Producer	Weekly

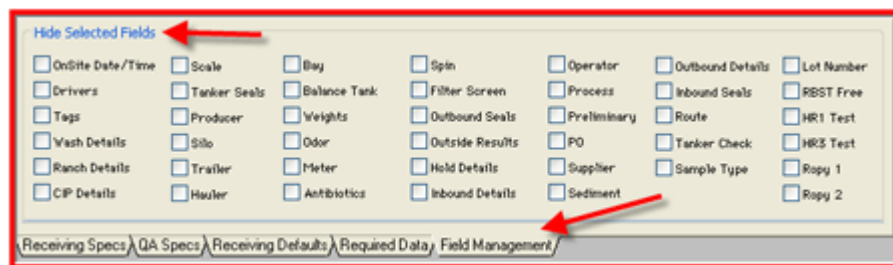

Note: In this example, Raw-silo is set up as a Product due to having different tests and specs than Raw (tanker samples).

Set Fields to Hide by Product

Go To Raw Program Menu > Raw Product Specifications > Field Management Tab > Click the Fields to Hide.

Benefits: See only the fields corresponding to the product you are testing; making data entry easier and QA Studio more customized to your facility.

Other New Items

The Fluid Main window has been enhanced. The benefits to you:

- Drastically reduced occurrences of a padlock (time a record is locked while editing).
- More sort options the data in view. In addition to the sort options you have by right clicking; you can now click on a column header and sort by that column.

The Fluid Product Spec Reports has been enhanced. The benefits to you:

- There is an additional sort option for the report.
- The Spec Report hides the tests with no specifications.
- Report visually enhanced; now contains your company logo.
