# Dairy Technology Workshop

September 21 - 24, 2009

**COURSE DESCRIPTION:** This is an in-depth training program for individuals having responsibilities in Processing, Sanitation, and Quality Control Practices in dairy operations. The objective is to provide the participants with basic knowledge regarding the properties of milk, principles of sanitation, and quality control. The material will be presented in practical terms so that the participants may gain a better understanding of the **Basics** of producing **Quality Products Efficiently**. Prior skills in chemistry and microbiology are not required. All material will be presented in practical terms with appropriate illustrations.

**WHO SHOULD ATEND:** This seminar is designed for Production Managers, Supervisors, Foremen, Trainees and Quality Assurance Personnel.

## **PARTICIPANT TESTIMONIALS:**

*"The instructors kept a great pace. The information inspired me to take a better look at my plant."*

*"All of the program is so helpful for everyone, even if you do not know much about the subject. You get to learn a little bit of everything."*

*"This workshop has caused me to expand my knowledge of dairy operations and how I personally impact food safety and quality. I'll return to my plant a better team member."*

*"I felt the interactive workshop was enlightening and stimulating. I would consider doing this at my own facility. I cannot recall a seminar where I gained so much real world knowledge. Kudos!!"*

## **COURSE OUTLINE**

- Dairy Technology 101 – Basics
- Basic Dairy Microbiology/Food Safety
- Good Manufacturing Practices (GMP's)
