

QA Studio Data Backups

Backups are easily performed in QA Studio. It is critical to routinely backup your data. Backups are performed when all QA Studio Users are out of the program. There are two places for QA Studio backups. You can make arrangements with your company's IT department to backup QA Studio from the server nightly. You can also set up a backup on the QA Manager's C drive in the Utilities menu. Just need to set up the path to the local C drive one time. Backup to the local C drive should take under 5 minutes. (C:\QA\backup).

DATA BACKUP	
✓	On Company Assigned Network Drive
✓	On QA Manger's Local C drive.
